Summary

Frontend engineer with **6+** years building and leading scalable web applications, including frontend architecture leadership and **team mentorship**. Recently led a **monorepo (Nx)** migration and a custom, **SSR-compatible design system**, and is driving a **micro-frontend rollout for independent**, domain-based deployment. Mentors 7+ developers and drives **AI-assisted** engineering adoption (**Cursor, Claude, GitHub Copilot**) across the team. Deep expertise across **React, Next.js**, and **TypeScript**, with a track record of defining engineering standards and shipping under tight deadlines.

Professional Experience

Senior Software Engineer, Khodro45.com ✉

May 2025 – present
Tehran, Iran

- Led migration of a legacy frontend to an **Nx monorepo**, reducing duplicated code by **35%** and accelerating cross-team **feature delivery**.
- **Designed a Hook Pattern + Atomic Design architecture** that reduced feature implementation time by **30%**.
- Built an **SSR-compatible design system** adopted across 6 projects.
- Introduced repository-wide quality gates, reducing review-related issues by **40%+**.
- Designed a **micro-frontend** platform that cut cross-team deployment dependencies by **50%**.
- **Mentored 7+ engineers**, reducing onboarding time by **30%**.
- Led **AI-assisted engineering** adoption, improving delivery speed by **25%**.

Frontend Chapter Lead (Promoted from Senior Frontend), Keepa ✉

June 2022 – May 2025

- Coordinated frontend development across **3 product teams**, aligning architecture and engineering standards using TypeScript, React.js, Next.js, Tailwind CSS, MUI, Vitest, and PWA technologies.
- Defined frontend engineering standards and mentored **6+ frontend developers**, collaborating closely with backend engineers, UX/UI designers, product owners, and the CTO.
- Achieved **100% Lighthouse scores** across Performance, Accessibility, Best Practices, and SEO for critical application pages.
- Led frontend performance optimization initiatives, reducing initial page load time by **30–40%** through SSR, code splitting, lazy loading, and asset optimization.

Senior Frontend Engineer, Unipolygames

March 2024 –
September 2024
Turkey

- Unipolygames is a web and mobile game development company specializing in entertainment and educational games.
- Developed and maintained web applications using the latest versions of React, React Query, and React Bootstrap.
- Collaborated with team members to deliver high-quality code and meet project deadlines.

Mid/Senior React Developer, Pelazio

April 2020 – June 2022

- Designed and delivered scalable, production-grade frontend features using Next.js, React.js, TypeScript, Redux (Saga, Toolkit, Thunk, Persist), SWR, Material UI, Ant Design, Mapbox, and Leaflet.js.

Internship/Junior Next.js Developer (Internship - Junior), Safarzoon

November 2019 –
January 2020

- Safarzoon aims to improve and introduce landmarks to both locals and international visitors.
- Worked as a front-end developer using Next.js, Redux Thunk, Material-UI, and ReactStrap.

Skills

Frontend: React.js, Next.js, Remix, Solid.js, JavaScript (ES6+), TypeScript
Backend: Python, Django, Node.js, NestJS
State Management: Redux (Toolkit, Saga, Thunk, Persist), TanStack Query (React Query), Zustand
Styling & UI: Tailwind CSS, Material UI (v4/v5), Ant Design
Architecture: Micro-Frontends, Nx Monorepo, SSR, CSR, PWA, Design Systems, Atomic Design
Testing & Quality: Vitest, Playwright, ESLint, Prettier, Sentry
Performance: Core Web Vitals, Lighthouse, Code Splitting, Lazy Loading, Bundle Optimization
DevOps & Tools: Git, GitHub, GitLab, Docker
Engineering Practices: Clean Code, SOLID, DRY, Agile/Scrum, Code Reviews
Leadership: Technical Leadership, Architecture Design, Team Mentoring, Cross-functional Collaboration, Engineering Standards, AI-assisted Development

- Soft Skills:**
- Leadership & Team Development
 - Cross-functional Collaboration
 - Creative Problem Solving
 - Agile & Scrum Methodologies
